PERFORMANCE PRODUCTS

Classic Braid

Enclosed you'll find a sample of Painless Performance's new Classic Braid. Seeing, touching and feeling is a lot better than looking at a picture! Plus, you can see how easy the woven sleeve slides over and curls around your vehicle's wiring or hoses.

Compared to our PowerBraid sleeve, the new Classic Braid has a tighter woven pattern with a satin black finish to give it a cloth-like appearance – perfect for hot rods and muscle cars! The durable material is lightweight and extremely flexible. Not only is it ideal for the aesthetics of your project, but it adds protection against abrasion and heat (up to 250°F). Also, the lateral split down the loom has an edge overlap of 25% material for a secure fit around wires without extra tape or tiewraps.

Classic Braid great for wires, but it also can be used around hoses, lines and other items throughout a build. Painless offers a variety of kits, sizes and lengths for your hot rod:

- 3/16", 20-feet – PN 70950
- 5/16", 20-feet – PN 70951
- 3/8", 20-feet – PN 70952
- 1/2", 20-feet – PN 70953
- 3/4", 20-feet – PN 70954
- 1", 10-feet – PN 70955
- Chassis Kit, PN 70970
- EFI Kit, PN 70971
- Gen II Camaro Kit, PN 70973

For more information on Classic Braid, please contact Todd Ryden at 915 497 0520, tryden@ingearmedia.net or check it out at www.painlessperformance.com

If you're looking for superior quality, engineering and craftsmanship, Painless is your only sensible choice. Painless has remained the leader in automotive wiring and electrical products for over twenty years through engineering and innovation, not corner cutting and imitation.
